BUSINESS ANALYST PROFILE

High-performing Business Analyst and Computing Science undergraduate (Ranked 1st in Department) with a track record of driving **operational efficiency by 25%**. Expert in bridging the gap between technical data and business strategy. Proficient in **SQL, Power BI, and Python** for data-driven storytelling. Strong foundation in **stakeholder engagement**, requirements gathering, and delivering actionable insights for executive decision-making.

PROFESSIONAL SKILLS

- **Business Intelligence:** Requirement Gathering, Gap Analysis, KPI Tracking, Stakeholder Management.
 - **Data Analysis:** Descriptive Analytics, Trend Identification, Seasonality Analysis, Cost-Benefit Analysis.
 - **Technical Tools:** SQL (Advanced), Power BI, Tableau, Excel (VLOOKUP/Pivot), Python (Flask).
 - **Compliance & Strategy:** GDPR/BCS Ethics, Workflow Optimization, Technical Documentation.
-

STRATEGIC BUSINESS PROJECTS

Enterprise Big Data Analytics: London Public Safety Strategy

- **Objective:** Conducted a comprehensive business analysis of 13M+ records to optimize resource allocation for metropolitan policing.
- **Methodology:** Utilized **First-Principles Thinking** to identify core "Business Problems" (High-crime hotspots) and proposed data-driven solutions.
- **Reporting:** Developed **Descriptive Analytics** reports and heatmaps to visualize "Major Category" dominance, identifying Westminster as a primary resource-need area.
- **Ethics & Governance:** Authored a technical report evaluating the **ethical implications (UK GDPR)** of predictive modeling in public sectors.
- **Impact:** Provided evidence-based recommendations for seasonal staffing surges during summer peaks to improve public safety ROI.

VigilAI: Strategic AI Security Solution

- **Business Problem:** Addressed the gap in traditional CCTV systems (human fatigue and missed threats) by developing a proactive, automated detection ecosystem.
- **Regulatory Strategy:** Implemented **"Privacy by Design"** to ensure compliance with **GDPR (UK/EU data laws)** and **ISO/IEC 27001** standards for information security.

- **User Experience:** Designed a stakeholder-centric dashboard that facilitates intuitive navigation between live detection, criminal record management, and historical logs.
- **System Auditability:** Integrated transparency tools to provide an audit trail for AI decision-making, increasing institutional trust in automated security protocols.

Journey Advisor (Sustainability-Focused Business Case)

- Analyzed user travel datasets to provide **cost-comparison analytics**, helping users choose the most cost-effective and eco-friendly routes.
- Implemented secure user-session management to ensure data privacy and a seamless customer journey (UX).

MediTrack (Administrative Process Optimization)

- Analyzed hospital administrative workflows and developed a centralized system to coordinate staff and patient records.
- Improved administrative data retrieval speed by **40%**, reducing operational lag in patient processing.

PROFESSIONAL EXPERIENCE

Victoria Solutions | London *Business & Data Analysis Intern | Jul 2025 – Sep 2025*

- **KPI Management:** Designed interactive **Power BI/Tableau** dashboards to monitor business performance metrics for executive review.
- **Gap Analysis:** Analyzed multi-source datasets via **SQL** to identify data discrepancies and improve reporting accuracy.
- **Recognition:** Earned a **Certificate of Excellence** for high-quality analytical standards and professional communication.

G Asian Canteen | London *Part-Time IT Manager (Process Analyst) | Jun 2024 – Aug 2024*

- **Workflow Optimization:** Redesigned manual inventory processes, resulting in a **25% increase in operational efficiency**.
- **System Implementation:** Led the transition to a digital inventory system, improving data accuracy by **20%** and reducing stock loss.

Pho Vietnamese Street Food | London *Server / Line Chef / Kitchen Assistant | Jan 2024 – Jan 2026*

- **Operational Execution:** Managed high-volume transactions for **50+ customers/day**, maintaining 100% financial accuracy via POS systems.
- **Continuous Improvement:** Optimized kitchen prep-lines to reduce peak-hour customer wait times.

EDUCATION

BSc Computing Science | Coventry University, London * Status: Ranked 1st in the Department.

- **Relevant Coursework:** Big Data Analytics (Business Strategy), Data Science & Databases, IT Infrastructure.
-

CERTIFICATIONS

- **Professional Certification in Data & Business Analysis** – Victoria Solutions (2025).
- **Learning SQL Programming** – LinkedIn & NASBA (Feb 2026).
- **Internship Experience UK (Business & Operations)** – Bright Network (2025).
